

# Check Free Memory

2016

You can check how much free memory a Linux client/server has using the **free** command:

```
free
      total        used        free      shared    buffers     cached
Mem:   947876      316360      631516         8628       24544      156116
-/+ buffers/cache:      135700      812176
Swap:   102396           0       102396
```
