

Encoding Live entries in Controller missing IP and Details

Oct 2018

For reference, this behaviour was observed when using the following Encoding Live and Controller versions:

EL
Controller

After installing Controller on it's own server, MFEL is then installed on a separate server, without any other software. When running the following command:

```
/opt/ericsson/encoding-live-server/setup/configure.sh --localIP x.x.x.x --serverID xx --controllerIP x.x.x.x
```

The entry is added to the Controller, but some information is missing.

Name	IP Address	Processing Type	Software	Status	Actions
MFEL1	N/A	Live Encoding	N/A	connected	
MFEL2	N/A	Live Encoding	N/A	N/A	
MFEL3	N/A	Live Encoding	N/A	N/A	
MFEL4	N/A	Live Encoding	N/A	N/A	
MFEL5	N/A	Live Encoding	N/A	N/A	
ctrlr1	192.168.81.11	Controller, Licensing	ericsson-controller 10.1.10.58, ericsson-license-manager 0.2.0-0	connected	

To fix this, use the following instructions:

On the controller machine, download the file `/etc/ericsson/secrets/mongo/secrets.ini`

On each Encoding Live Server, create this folder: `/etc/ericsson/secrets/mongo/`

Command: `mkdir -p /etc/ericsson/secrets/mongo/`

Copy the file `secrets.ini` downloaded from the Controller to this path `/etc/ericsson/secrets/mongo/`

Relaunch `/opt/ericsson/encoding-live-server/setup/configure.sh --localIP x.x.x.x --serverID xx --controllerIP x.x.x.x`
