

nCompass Control

Apr 2424

nCompass Control is not a single application, but a suite of applications, the main three applications are:

Equipment Setup.
Equipment Status Manager (ESM).
Profile Manager

Equipment Setup:

This is a tool to create a map that consists of physical items such as hardware components and fixed addressing.

Equipment Status Manager has three main tasks:

1. Creation of Service Profiles
2. System Health Monitoring
3. Manual Switching of devices / services

Profile Manager

This allows creation and scheduling of system profiles.
