nCompass Control

Apr 2424

nCompass Control is not a single application, but a suite of applications, the main three applications are:

```
Equipment Setup.
Equipment Status Manager (ESM).
Profile Manager
```

Equipment Setup:
This is a tool to create a map that consists of physical items such as hardware components and fixed addressing.

Equipment Status Manager has three main tasks:
1. Creation of Service Profiles
2. System Health Monitoring
3. Manual Switching of devices / services

Profile Manager
This allows creation and scheduling of system profiles.

- Duplicate Server Entries in Controller
- Encoding Live entries in Controller missing IP and Details
