Packager Live Configuration

Jun 2017

Introduction

This section assumes that you or someone has completed the Installation & OS Configuration section.

Packager Configuration

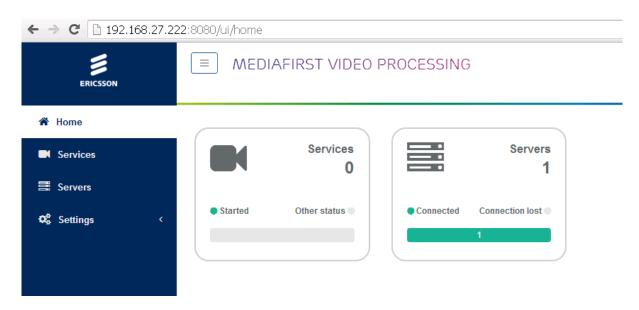

First we need to login, Navigate to your device http://serveripaddress:8080 and you will see the following login page:

\leftrightarrow \rightarrow C (i) Not secure 192	2.168.27.100:8080/ui/accounts/login/?next=/ui/home
ERICSSON	■ MEDIAFIRST VIDEO PROCESSING
	Username
	Username
	Password
	Password
	Login

Login using the following:

Username: admin Password: admin

Once logged in you should see the following page:

On a new server, the Services count will be zero. Servers will be 1 (if this is a stand alone system).

1/4

Last update: 2023/03/09 22:35	
22:35	

Click the Servers panel.

ERICSSON		NEDIAFIRST V	IDEO PROCESSING			admin 🏝 🌣
	Home / Servers					
A Home						
Services	Search in	table				
-	Name 🖨	IP Address 🖨	Processing Type	Software	Status	Actions
Servers Servers	Pkg1	192.168.27.222	Live Packaging , OD Packaging , Catalog , Controller	mfvp-controller 1.0.8.7 , mfvp-packaging 8.0.8.41	connected	0
♥\$ Settings <	Rows per	page: 20 +				

You will see your server listed, what is supports (Live Packaging, OD Packaging etc.) and the software versions.

Configure HTTP Headers of the origin server

HTTP Headers define the access rules to the origin server, and the CDN caching policy.

In the example below, we simply authorize any website to access any content on the origin server. This is not a valid production configuration; however this is fine for testing.

Minimum pattern is * Access-Control-Allow-Origin:*

On the left hand menu, click 'Settings'

← → C 🗋 192.168.27.22	22:8080/ui/home			
ERICSSON	■ MEDI	AFIRST VIDEO P	ROCESSING	<u>;</u>
😤 Home				
Services		Services 0		Servers 1
E Servers				
😋 Settings 🗸 🗸	Started	Other status	 Connected 	Connection lost
Credentials				1
H HTTP Headers				

Now select 'HTTP Headers'

Add a new entry using * for Url Pattern and Access-Control-Allow-Origin:* for the HTTP Headers.

#	Url Pattern	HTTP Headers
=	*	Access-Control-Allow-Origin:*
+ Add		

Click 'Save and Exit'

Catalog configuration

A catalog is an output definition, so we can create a catalog for HLS, for Dash, for Smooth Streaming and add the catalog's (outputs) to our packaging service configurations.

Click add service and select catalog

ERICSSON	MEDIAFIRST VIDEO PROCESSING Home / Services
🖀 Home	Add service - Import service
Services	Catalog
Servers	Live Packaging cessing Type 🗢
📽 Settings 🛛 <	VOD Packaging

This will allow the creation of a new Catalog.

Enter a name for the new Catalog.

Catalog					
	Name*	HLS			
Output Name 🗢	Ţ	ype ≑	Access URL 🗢	Encryption 🗘	Content repl. 🗢
+ Add new output					

Click Save and Continue (the Add New Output button will not work until you click Save and Continue.

The Catalog will need some outputs defined, you can add multiple outputs to a Catalog, so a single Catalog can have HLS, HSS and Dash outputs for example.

Click on the Add new output button.

This will open the page for new outputs.
