Packager Live Configuration

Jun 2017

Introduction

This section assumes that you or someone has completed the Installation & OS Configuration section.

Packager Configuration

First we need to login, Navigate to your device http://serveripaddress:8080 and you will see the following login page:

\leftrightarrow \rightarrow C (i) Not secure 192	2.168.27.100:8080/ui/accounts/login/?next=/ui/home
ERICSSON	■ MEDIAFIRST VIDEO PROCESSING
	Username
	Username
	Password
	Password
	Login

Login using the following:

Username: admin Password: admin

Once logged in you should see the following page:

On a new server, the Services count will be zero. Servers will be 1 (if this is a stand alone system).

1/6

Last update: 2023/03/09 packager_live_configuration http://cameraangle.co.uk/doku.php?id=packager_live_configuration&rev=149789	97733
---	-------

Click the Servers panel.

ERICSSON	⊟ M Home / Se		IDEO PROCESSING			admin á	1 O
🖀 Home							
Services	Search in	table					
-	Name 🖨	IP Address 🛢	Processing Type	Software	Status		Actions
Servers Servers	Pkg1	192.168.27.222	Live Packaging , OD Packaging , Catalog , Controller	mfvp-controller 1.0.8.7 , mfvp-packaging 8.0.8.41	connected	۲	۲
Q ⁸ Settings <	Rows per	page: 20 🔹					

You will see your server listed, what is supports (Live Packaging, OD Packaging etc.) and the software versions.

Configure HTTP Headers of the origin server

HTTP Headers define the access rules to the origin server, and the CDN caching policy.

In the example below, we simply authorize any website to access any content on the origin server. This is not a valid production configuration; however this is fine for testing.

Minimum pattern is * Access-Control-Allow-Origin:*

On the left hand menu, click 'Settings'

← → C 🗋 192.168.27.2	22:8080/ui/home			
ERICSSON	■ MEDI	AFIRST VIDEO F	PROCESSING	<u>;</u>
倄 Home				
Services		Services 0		Servers 1
🛢 Servers				
😋 Settings 🗸 🗸	Started	Other status	Connected	Connection lost
Credentials				1
H HTTP Headers				

Now select 'HTTP Headers'

Add a new entry using * for Url Pattern and Access-Control-Allow-Origin:* for the HTTP Headers.

#	Url Pattern	HTTP Headers
≡	×	Access-Control-Allow-Origin:*
+ Add		

Click 'Save and Exit'

Catalog configuration

A catalog is an output definition, so we can create a catalog for HLS, for Dash, for Smooth Streaming and add the catalog's (outputs) to our packaging service configurations.

Click add service and select catalog

ERICSSON	MEDIAFIRST VIDEO PROCESSING Home / Services				
希 Home	Add service - Import service				
Services	Catalog				
E Servers	Live Packaging				
📽 Settings 🛛 <	VOD Packaging Output T Catalog				

This will allow the creation of a new Catalog.

Enter a name for the new Catalog.

Catalog					
	Name*	HLS			
Output Name 🗢	Ţ	ype ≑	Access URL 🗢	Encryption 🗘	Content repl. 🗘
+ Add new output					

Click Save and Continue (the Add New Output button will not work until you click Save and Continue.

The Catalog will need some outputs defined, you can add multiple outputs to a Catalog, so a single Catalog can have HLS, HSS and Dash outputs for example.

Click on the Add new output button.

This will open the page for new outputs.

	ST VIDEO PROCES	SSING			admin 🌡 🔅
Home / Services / Outpu	it1 / Add Output				
Output					
Nan	ne* HLS				
Туј	e* HLS			Ŧ	
Publishing					
Access UF	RL* HLS				
Playlist distribution UF	٤L				
Media distribution UF	۱L				
Manifests					
Na		Filtering			
ind			di s		
+	Add manifest				
Scrambling					
Scrambling Encryptic	on* None			Ŧ	
				Ŧ	
Encryptic	t			T	
Encryption	t 				
Encryptia Content Replacemen Replacement ty	t 5				
Encryptic Content Replacemen Replacement typ Advanced parameter	t s	ł audio			

Enter the following:

```
Name: HLS
Type: HLS (from dropdown list)
Access URL: HLS (this will form part of the URL to retrieve the packaged segments)
```

Click Save and Exit.

Now add a second output for Dash using the same procedure, but using Dash instead of HLS for each section.

You have now configured a Catalog (an output basically) for Dash and HLS.

Add Live Packaging

To add a live packaging service, from the services panel, select Add Service, then Live Packaging.

← → C 🗋 192.168.2	7.222:8080/ui/services/
ERICSSON	MEDIAFIRST VIDEO PROCESSING Home / Services
🖀 Home	Add service - Import service
Services	Catalog
🛱 Servers	Live Packaging
🕰 Settings 🛛 <	VOD Packaging Output i Catalog
	Rows per page: 20 •

On this page we can configure our packaging parameters.

Try not to make any mistakes on this page, once you have saved it, you cannot edit it.

Name: Name of the service
GOP Duration: GOP Duration of incoming TS
GOP Signalling: How the GOP Boundaries are signalled. EBP for Ericsson sources.
IP Address: Multicast to tune to.
Port Range: ABR Port range.
Publishing Point: This is the file location, for local we are using the NAS drive we configured earlier,
sub folders should be automatically created. file://nas/servicel for example.
DVR Duration: How far back we can rewind.
Catalog: Select your output Catalog here

Last update: 2023/03/09 packager_live_configuration http://cameraangle.co.uk/doku.php?id=packager_live_configuration&rev=1497897733

Access URL: a name that will form part of the access URL.

At the bottom of this page you can see the full access URL(s).

Access URLs

- http://<host>/dash/service1/manifest.mpd
- http://<host>/HLS/service1/index.m3u8

So these are constructed from the Interface IP <host>, the Catalog Output /HLS, the Access URL in the publishing service /service1 and the index name specified in the Catalog /index.m3u8.

Generally the server will have multiple network interfaces, and the packaged stream can be accessed from any of them.

Start the Service
