

Web GUI URL and Port

Mar 2017

Introduction

To connect to the VSPP web gui, you need to connect to the correct port (**8443**). You can use the following URL with your own IP to connect to the relevant VSPP unit.

```
https://ipaddress:8443/FabrixManager/layout.vod#
```

If you don't use **https**: then you simply won't connect. By using **https**: you will probably get a certificate error.
