

Encoding Live entries in Controller missing IP and Details

Oct 2018

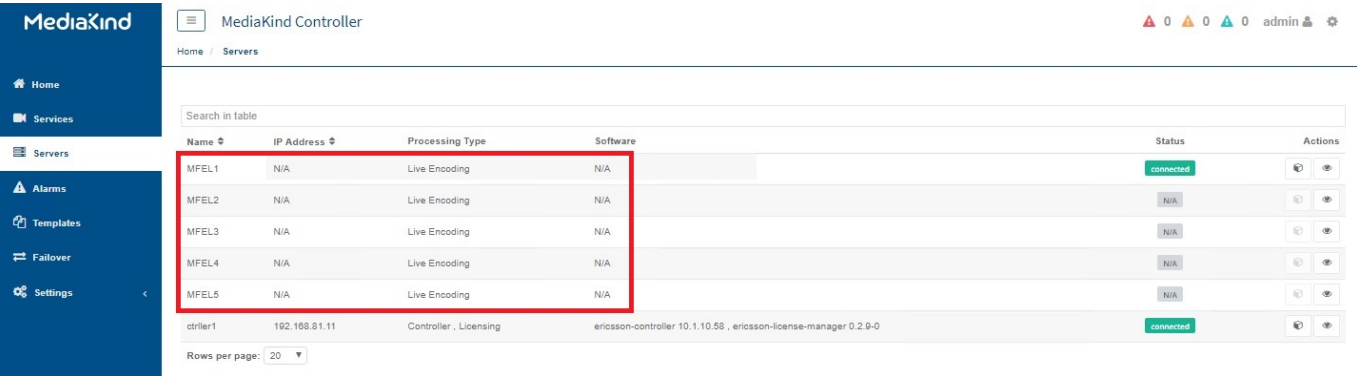

For reference, this behaviour was observed when using the following Encoding Live and Controller versions:

EL	10.1.8.3
Controller	10.1.10.58

After installing Controller on it's own server, MFEL is then installed on a separate server, without any other software. When running the following command:

```
/opt/ericsson/encoding-live-server/setup/configure.sh --localIP x.x.x.x --serverID xx --controllerIP x.x.x.x
```

The entry is added to the Controller, but some information is missing.

The reason for this is **mongo database credentials** (or lack of), by using the following steps, you are giving access credentials to the mongo database on the Controller to each MFEL

To fix this, use the following instructions:

```
On the controller machine, download the file /etc/ericsson/secrets/mongo/secrets.ini

On each Encoding Live Server, create this folder: /etc/ericsson/secrets/mongo/

Command: mkdir -p /etc/ericsson/secrets/mongo/

Copy the file secrets.ini downloaded from the Controller to this path /etc/ericsson/secrets/mongo/

Relaunch /opt/ericsson/encoding-live-server/setup/configure.sh --localIP x.x.x.x --serverID xx
--controllerIP x.x.x.x
```

NOTE: On a T1, I have had to run this 3 times, as different elements get upgraded each time.
