Force a service to a CPU

Oct 2019

Introduction

The G6/G7/G8 servers have two Xeon CPUs. Each CPU has it's own bank of RAM. We can force a particular service to one of the CPUs by using the following Advanced Parameter:

```
liveTranscoder.numaNode=(0 or 1)
```

Remember The Max CPU figure for our servers is 85%. So if you are using a single CPU, the max for that CPU is going to be 42.5%
