

IP Tables

Mar 2017

IPTables is used on the MFEL/MFVP to protect the unit, however during setup it might be an idea to disable it (temporarily) if you are unable to see certain IP Streams.

IPTables is a massively complex topic, and I don't know that much about it, but what I do know is how to stop and start it.

Check IP Tables Status

```
service iptables status
```

Stop IP Tables

```
service iptables stop
```

Start IP Tables

```
service iptables start
```
