# IPHE

Apr 2021

---

IPHE is the latest cloud oriented version of our software, this includes (but is not limited to):

```
Encoding Live
    Stat Mux
Stream Processing
    Simulcrypt
Packaging
Controller
```

This product can be deployed on Bare Metal servers, VMs or cloud instances. While I have used the title 'IPHE' this includes Aquila Streaming and Aquila Broadcast, they are essentially the same thing, it's just the deployed products that actually change.

---

- Kubernetes K8
- CentOS not Booting
- Clear RAM / Cache Centos
- Duplicating Encoding Profiles
- Editing Profile Resources
