

# Manually Configure Controller Configuration

Jun 2017

I have only needed to do this once, this was after an IP Address change that was not reflected in the web interface. I was able to make this change from this file:

Navigate to:

```
/opt/ericsson/server-daemon/etc/
```

To make any changes edit the file called:

```
server-daemon.ini
```

Save any changed and restart the service (or the server)

```
systemctl restart ericsson-server-daemon
```
