

Red Team Field Manual (RTFM)

The Red Team Field Manual is a kind of reference guide to Linux, Windows, Cisco etc. It contains all the really useful information in a book small enough to carry around everywhere. Some of the really useful pages I will be keeping on here for 'my own' reference. You didn't see this page right (i'll fork bomb u if you did)

```
watch ss -tp Network connections netstat -ant Tcp connections -anu=udp netstat -tulpn Connections with PIDs Isof -i Established connections smb: ip /share Access windows smb share share user x.x.x.x c$ Mount Windows share smbclient -U user\
```

```
ip
```

```
share ifconfig eth# ip I cidr ifconfig ethO:I ip I cidr route add default gw gw ip ifconfig eth# mtu [size] export MAC=xx: XX: XX: XX: XX  
ifconfig int hw ether MAC macchanger -m MAC int iwlist int scan dig -x ip host ip host -t SRV service tcp.url.com dig @ ip domain -t AXFR  
host -I domain namesvr ip xfrm state list ip addr add ip / cidr dev ethO /var/log/messages | grep DHCP tcpkill host ip and port port echo "I"  
/proc/sys/net/ipv4/ip forward echo nameserver x.x.x.x /etc7resolv.conf
```
