

# Web GUI URL and Port

Mar 2017

## Introduction

To connect to the VSPP web gui, you need to connect to the correct port (8443). You can use the following URL with your own IP to connect to the relevant VSPP unit.

```
https://ipaddress:8443/FabrixManager/layout.vod#
```

If you don't use `https`: then you simply won't connect. By using `https`: you will probably get a certificate error.
