Disable Reference B Frames in HEVC

Jan 2017

Here are the advanced parameters to disable reference B-frames in HEVC:

```
nex.numBFrames=2
nex.useDynamicB=0
```

Note that it will degrades the VQ. We need to be sure that it's needed.

Moreover, if reference B-frames are not supported by their STB, I strongly doubt about their ability to decode our HEVC interlaced streams.
