CentOS 7x

This page contains both entries that are specific to version 7, and anything new learned while using 7 (that may well work in 6). I have no intention once fully using v7 to maintain the v6 pages in general, but will still update v6 specific items.

- IP - the ifconfig replacement
- Add ifconfig
- Add DNS Server
- Use Curl as wget replacement
- CentOs 7 no WGET install EPEL
- CentOS 7 Interface naming
- CentOS 7 Gateways
- NTP Start at Boot
- NTP Start Issue
- Interface Renaming Scripts
- CentOS NTP Server
- TOP CPU Usage
- Screen
- ifup and ifdown
- LFTP
- Finding Files
- Use Watch for repetitive command line actions
- IP Route Issue with Local Addresses
- nmcli Network Tool
- Interface Team or Bond with nmtui
- Show Hard Disk Size
